

Sathish M

Certified Penetration Tester | Ethical Hacker

9597124881 | sathish1012cybok@gmail.com | linkedin.com/in/amsathish
github.com/cybok10 | sathish-cyber.vercel.app

SUMMARY

Certified Penetration Tester and Ethical Hacker with hands-on expertise in vulnerability assessment, exploit development, web and network pentesting, and offensive security operations. Proficient in Python and Java for security automation, tool development, and building cybersecurity platforms. Experienced across the full attack-and-defence lifecycle — from reconnaissance and exploitation through to incident response, SIEM monitoring, and secure software development.

EDUCATION

Dhanalakshmi Srinivasan Engineering College (A)

B.E. Computer Science and Engineering — CGPA: 8.6

Perambalur, TN

2022 - Present

St. Joseph's Matric. Hr. Sec. School

Higher Secondary Certificate (HSC) — 70% | SSLC — 94%

Gingee, TN

2018 - 2022

TECHNICAL SKILLS

Offensive Security: Penetration Testing (Web, Network, Cloud), Exploit Development, Privilege Escalation, Post-Exploitation, OWASP Top 10, SQLi, XSS, IDOR, CSRF, Broken Auth, Command Injection

Security Tools: Metasploit Framework, Burp Suite Pro, Nmap, Wireshark, Snort, Recon-ng, Wazuh SIEM, Wazuh GCP, PortSwigger Labs

Security Dev & Automation: Python (exploit scripts, recon tools, automation), Java (Spring Boot security apps), Bash scripting, REST API integration

Frameworks & Libraries: Flask, FastAPI, Spring Boot, Scikit-learn, TensorFlow, NumPy, Pandas

Cloud, DevOps & Monitoring: GCP, AWS Fundamentals, Docker, Apache Web Server, Wazuh SIEM, Log Monitoring, Incident Response

Other: Git, Linux (Ubuntu), Arduino, Raspberry Pi, MQTT, IoT Security, SOC Fundamentals

PROJECTS

VulnLab - Vulnerable Web Application for Pentesters

Aug 2024 - Dec 2024

Offensive Security Training Platform

Python (Flask), Java (Spring Boot), MySQL, Docker, Burp Suite

- Architected and built a deliberately vulnerable web application covering SQLi, XSS, IDOR, CSRF, Broken Authentication, Command Injection, and File Upload vulnerabilities for hands-on pentesting training
- Deployed challenge levels in an isolated Docker environment with an automated scoring system and guided exploitation paths; used as a personal CTF-style lab

AI-driven Network Intrusion Detection System

Mar 2024 - Jul 2024

ML-Based Threat Detection

Python, Scikit-learn, TensorFlow, Wireshark, Snort, Ubuntu Linux

- Built an intelligent network IDS using ML classification models trained on live traffic captures to detect and block malicious activity in real time with high accuracy
- Integrated with Snort for rule-based alerting and Wireshark for deep packet inspection and traffic analysis

Centralized Log Monitoring - GCP, Wazuh & Apache

Oct 2023 - Feb 2024

SIEM & Threat Visibility Platform

Python, Google Cloud Platform, Wazuh, Apache Web Server

- Designed a centralised log ingestion and correlation pipeline using Wazuh SIEM on GCP with automated anomaly detection, real-time threat dashboards, and Python-scripted alert workflows
- Reduced manual log review effort significantly; platform used for SOC-style monitoring of simulated attack scenarios

SkillPath AI Platform

Jan 2025 - Present

Secure AI-Powered Learning Platform

Python, FastAPI, OpenAI API, JavaScript, SQLite

- Developed a secure AI platform delivering personalised cybersecurity and programming skill roadmaps; implemented input validation, auth controls, and API rate-limiting as part of secure-by-design development
- Built REST API backend with FastAPI and SQLite, applying OWASP secure coding principles throughout

EXPERIENCE

Penetration Testing Intern <i>Cyber Nerd</i>	Aug 2025 – Oct 2025 <i>Remote</i>
- Conducted full-cycle penetration tests on web and network targets — reconnaissance, enumeration, exploitation, and reporting — using Metasploit, Nmap, and Burp Suite Pro - Developed Python automation scripts for vulnerability scanning and report generation; performed system hardening and security configuration reviews	
Ethical Hacking Intern <i>Internship Studio</i>	Jun 2024 – Aug 2024 <i>Remote</i>
- Performed digital footprinting, OSINT reconnaissance, and vulnerability assessments using Metasploit, Burp Suite, Nmap, and Recon-ng; delivered detailed reports with CVSS-rated findings and remediation guidance - Built Python-based automation tools for passive and active recon workflows	
Cybersecurity Intern <i>The Red Users</i>	Nov 2024 – Dec 2024 <i>Remote</i>
Executed threat analysis, vulnerability assessment, and security protocol reviews using enterprise-grade security tools; contributed to SOC monitoring workflows and incident detection and response procedures	

CERTIFICATIONS

- Certified Penetration Testing – RedTeam Hacker Academy (Ongoing) - Advanced Ethical Hacking – GUVI - Offensive Pentesting – Cybrary - Wireshark & Metasploit – Infosys Springboard - Linux, Network Security, Nmap – Udemy	- Diploma in C & C++ Programming – TCEDS (Sep 2022) - Internet of Things (IoT) – NPTEL - Networking Basics – Cisco (Aug 2024) - Cybersecurity and Hacking – GUVI - CyberSecurity & Ethical Hacking – Internship Studio
--	--

WORKSHOPS & WEBINARS

- OWASP Community Meetup, Coimbatore 2-Day Ethical Hacking Workshop – NIT (Remarkskills) - Cybersecurity Awareness Workshop, DSEC AI in Cybersecurity – National Webinar 5-Day Internship – Promptinfo Tech Power BI Training – ICT Academy - Python Workshop – TopEngineers, IIT Madras, Chennai	<i>Oct 2025</i> <i>Mar 2025</i> <i>Jan 2025 / Dec 2024</i> <i>Aug 2024 / Dec 2024</i> <i>Aug 2023</i>
---	---

LEARNING ACTIVITIES

- Actively solving CTF challenges and security labs on TryHackMe, OverTheWire, PortSwigger Web Security Academy, and PicoCTF - Developing Python and Java security tools focused on exploit automation, recon scripting, and secure application development - Continuously deepening offensive and defensive skills through real-world attack simulation, vulnerability research, and security blog writing
